I can phone you at 12:00. As to whether we can spit things up – I don't think that would speed up the process. Have to say I think the original schedule with r2c being finished in May was far more realistic. In case anyone asks.

Elizabeth,

I totally agree on your points below. It might be best to talk some of it over and it might be better to split some things out. Are you free at 12 to give me a call? I have call forwarding on so you can just call my office number below.

Elizabeth,

I can revise that to make clearer that the response to comment would be done the same time as the HH RA which was really my intent, maybe it would be better to add a day.

Discussing tomorrow won't be helpful, I'll revise around lunch time and resend. My plan is to attempt to provide a sketch of our thoughts to Rick this afternoon.

Hi, Eric. Will we have time to talk about this tomorrow at the team meeting? You ask below whether any of us think we will need more time to complete our tasks. I do not think the r2c document can be finished by 3/25 if the RA for human health is to be completed by 3/27. But we can discuss tomorrow and try to determine if there is any way forward with the schedule you provided today.

Subject: draft schedule for Oxitec EUP application

All,

Management and I have a update with Rick on the Oxitec application status this afternoon at 4:30. I've attached a draft schedule, could you all look at it and let me know if I am missing anything or if we think we need more time to complete any of the tasks outlined.

Thanks.
